

List Of Values

This list of values will help you develop a clearer sense of what's most important to you in life. Simply print out these pages, mark the values that resonate best with you and sort your list in order of priority. As you scan, you may find that while most values have little or no significance to you (some may even seem negative), there are those values that jump out and call to you with a "Yes, this is part of me." This list is merely a guide. It is lengthy but certainly not exhaustive, so feel free to add values to your own list!

Abundance	Being the Best	Congruency	Diligence	Exploration
